Subject: 002 Create a Captive Web Portal

Team 3,

The CIO has requested that a captive web portal be implemented on our firewall in order to ensure that only authenticated users are allowed access to the internet. We have a meeting with the CIO and would like to inform him that this security measure has been implemented.

Respond with a memo verifying this is complete and the screen shot of a captive portal splash page for an inside device attempting to reach the Internet,

Thank you.

IT Director
