Subject: Configure NTP

Team, we really need to have a consistent time on our network if we want our log files to be of any use. We cannot have servers showing whatever time that they feel like.

Inject Instructions:

- 1) You are to set up one main clock on the network that every machine will be reconfigured to get the time from.
- 2) Please configure all devices, servers and workstations to get their time from this clock.

Provide screen shots demonstrating that the time is synced across all machines and devices, including the commands and/or utilities used to accomplish the tasks.

Thank you.

Director - Systems Engineering
