Subject: Config FW Policies to Limit SSH/FTP Access

Configure firewall policies on the Palo Alto to limit SSH and FTP application access to ONLY allow connectivity to/from the CentOS E-Commerce (172.20.240.11) and the 2003 Svr FTP server (172.20.241.9).

- To show that SSH and FTP connectivity is working, screenshot a successful SSH and FTP connection from 172.20.241.9 to the CentOS server.

- Screenshot a failed connection attempt from the Debian Email server (172.20.241.39) to the CentOS Server to show that the FW is correctly blocking traffic.

- Screenshot the Palo Alto configuration/policies implemented.

Thank you.
