Subject: 003 APT Attack

We have been advised this morning by the FBI that our internal network has been infiltrated in the general manner of an APT attack. We need to step up our detection to insure that we do not have a breach of our intellectual property and confidential data.

We need to be prepared with an incident handling plan. Please develop and incident handling policy in the event that we do have a breach. What technical steps and tasks will we take if a breach is detected.

Thank you.

IT Director
