To: Infrastructure Support Group

Subject: 001 Asset Inventory and Assessment

The CEO has engaged an external Cyber Security Assessment group to evaluate our resiliency to attacks. Please prepare a document that lists all the server and network components together with their application functionality (email host, web server etc....). List the protocols and ports that these devices should answer up for (SSH, Web service etc....). We'll call this the Asset Inventory and Assessment Report and it will become part of our organization's ongoing documentation.

Thank you.

CIO Management Team
